

Test Matrix

Project: Hershive Social Media
Developed by: Hershell – DIT 2-1
Document Type: Test Matrix
Date: 26 July 2025

Introduction

This document outlines the test matrix for Hershive Social Media, detailing each feature and the associated test cases, inputs, expected results, and outcomes. It ensures comprehensive coverage of functionality, UI, compatibility, security, and performance.

Legend

- **Pass:** The test case met the expected outcome.
- **Fail:** The test case did not meet the expected outcome.
- **N/A:** Not applicable or not tested.

Test Matrix Table

Feature Group	Test Case Description	Input / Preconditions	Expected Result	Test Status
User Authentication & Account Management	Valid user registration	Valid email and password meeting criteria and unique username	Account created successfully and verification email sent	Passed
User Authentication & Account Management	Invalid email format	Invalid email format (e.g. test@invalid)	Error message displayed and registration fails	Passed
User Authentication & Account Management	Duplicate email registration	Email already registered in system	Error message: Email already exists	Passed

User Authentication & Account Management	Weak password validation	Password not meeting security criteria	Error message with password requirements	Passed
User Authentication & Account Management	Social media signup (other socmed)	Valid social media account	Account created using social login	Passed
User Authentication & Account Management	Valid credentials login	Correct email/username and password	Successful login and redirected to dashboard	Passed
User Authentication & Account Management	Invalid credentials	Wrong email/password combination	Error message: Invalid credentials	Passed
User Authentication & Account Management	Social media login	Valid social media account	Successful login via social platform	Passed
User Authentication & Account Management	Valid password reset request	Valid registered email address	Reset email sent and reset link works	Passed
User Authentication & Account Management	Invalid email reset request	Non-registered email address	Error message or no action (security)	Passed
User Authentication & Account Management	Profile information update	Valid profile data changes	Profile updated successfully	Passed
User Authentication & Account Management	Password change	Current password + new valid password	Password updated successfully	Passed
User Authentication & Account Management	Account deletion	User requests account deletion	Account deactivated and data handled per policy	Passed
User Profile Management	Complete profile setup	All required fields filled	Profile created with all information	Passed
User Profile Management	Profile picture upload	Valid image file (JPG/PNG)	Image uploaded and displayed	Passed
User Profile Management	Cover photo upload	Valid image file within size limits	Cover photo updated successfully	Passed
User Profile Management	Bio/description update	Text within character limits	Bio updated and saved	Passed
User Profile Management	Privacy settings modification	Change visibility settings	Privacy settings applied correctly	Passed
User Profile Management	Profile view	Navigate to other user's profile	Profile displays correctly and view-only	Passed
Global Wall	Create a post and verify it appears on the wall	Logged-in user + post content	Post appears on global wall	Passed

Global Wall	View other users' posts	User is logged in	See global feed including others' posts	Passed
Global Wall	Infinite scroll	Scroll through feed	More content loads automatically	Passed
Post Management	Create new post	Text , image, video input	Post is saved and shown	Passed
Post Management	Edit an existing post	Select post	edit content,Post updated with new content	Passed
Post Management	Delete a post	User selects own post	clicks delete, Post removed from wall	Passed
Post Management	Character limit validation	Text exceeding character limit	Error message and post not published	Passed
Post Customize	Format post using WYSIWYG editor	Bold	italic,etc. Post displays formatted text,	Passed
Post Customize	Upload and add picture to post	Image file	Image shown in post	Passed
Sharing Posts	Share post to other platform	OAuth connected	Post shared successfully to selected platform	Passed
Sharing Posts	Share post internally	Share post within	Post shared successfully in own website	Passed
User Interaction	Like a post	Logged in user clicks Like button	Like count increases only 1, button toggles	Passed
User Interaction	Unlike a previously liked post	Post is already liked	Like removed, count decreases only 1	Passed
User Interaction	Comment on a post	User types and submits comment	Comment appears real time	Passed
User Interaction	Edit own comment	User clicks edit icon on their comment	Text becomes editable, saved on update	Passed
User Interaction	Delete own comment	User deletes their comment	Comment disappears, count updates	Passed
User Interaction	View post timestamp	Post has creation datetime	Time displayed properly	Passed
User Interaction	Follow another user	User clicks Follow on profile	Following count updates	Passed
User Interaction	Unfollow user	User clicks again	Follow state removed	Passed

User Interaction	View list of followers/following	Click on user's follower count	Modal/list shows usernames	Passed
Notifications	Receive like, comment, follow, share notification	Another user likes your post	Notification appears	Passed
Notifications	Notification preview	Another user interacts on your post	Notification with preview when clicked	Passed
Notifications	See notifications feed	Logged in user clicks notifications icon	Dropdown/page shows latest alerts	Passed
Notifications	Notification badges	Unread notifications	Badge count displayed	Passed
Media Support	Upload image to post	Upload PNG/JPG	Image preview and post with image	Passed
Media Support	Upload video/audio to post	Upload MP4	Media embedded with player controls	Passed
Media Support	Play embedded media	User clicks play	Video/audio plays	Passed
Privacy & Visibility	Set post to private/public/followers	Dropdown on post creation	Post visible only to allowed users	Passed
Privacy & Visibility	View visibility status of a post	Hover or icon indicator	Icon shown	Passed
Privacy & Security	Account deletion	Request account deletion	Account deletion process initiated	Passed
Search	Search for exact username	Valid full username	Correct user profile and posts appear	Passed
Search	Partial match on username	Substring of existing username	Multiple matching users shown	Passed
Search	Search by post content	Keyword from a post	Posts containing the keyword appear	Passed
Search	Case-insensitive search	jaSi vs "JASi"	Results should be identical	Passed
Search	No results found	Gibberish text like "asdk123!@#"	"No results" message shown	Passed
Search	Special character search	@ # %	No crash or error	Passed
Security	Cross-site scripting (XSS) in post	<script>alert(1)</script>	Script not executed; content escaped	Passed

Security	Access profile without login	Direct URL to /user/jaSi	Redirected to login page or denied	Passed
Cross-Browser Compatibility	Load site in Chrome	Firefox Edge Safari	Layout & functionality consistent across all	Passed
Cross-Browser Compatibility	Post formatting across browsers	Formatted post from Chrome	Render identically in other browsers	Passed
Cross-Browser Compatibility	Media playback across browsers	Video/audio post	Media loads and plays on all supported browsers	Passed
Cross-Browser Compatibility	Emoji rendering across browsers	Post emoji on one browser	Displays the same in others	Passed
Error Handling	Submit empty post	Click "Post" with no content	Validation error shown	Passed
Performance	Load global wall with 100+ posts	Backend seeded with sample data	Wall loads within acceptable time (e.g. <2s)	Passed
Performance	Upload image file	Image >10MB	Upload completes or shows progress	Passed
Performance	Search term with many matches	Search common term like "hi"	Search result loads fast (<1s)	Passed
Performance	Multiple tabs open simultaneously	Same user logged into 3+ tabs	Sessions sync correctly; no conflict	Passed

Summary

Total Test Cases: **70**

Passed: 70

Failed: **0**

Not Tested: **0**

Notes & Observations

- All major functionalities passed test conditions.
- No critical bugs were observed during test runs.
- Performance and media tests indicate the app can scale effectively under user interactions.
